

VxCloud Hosting & VPS

VxCloud provides fast, reliable and secure access to dedicated and virtual hosted servers. We are assured that we can offer the highest speeds of access in South Africa. VxCloud dedicated servers can be provided in multiple South African locations.

Our dedicated and virtual servers are optimised for reliability and high availability. VxCloud hosting service is offered to both Linux and Microsoft. We offer specific VPS plans to suit the client's specific needs. VPS hosting plans are designed to suit any type and size of business, with affordable monthly payment options.

VxCloud can provide clients with dedicated hosted and VPS services no matter the hosting requirements. All VxCloud services are underpinned by well-known and trustworthy brands of both hardware and software. Software Defined Storage provides high availability, redundancy and cloud storage replication.
