

VxCloud Fibre

VxCloud provides multiple Fibre solutions including FTTH (Fibre to the Home)/FTTB (Fibre to the Business), Metro Ethernet and Point to Point access. VxCloud FTTH is part of the Telkom OpenServe network that supports small, medium and large enterprises with fibre connectivity. We provide fast fibre networking access at an affordable price.

VxCloud Metro Fibre provides fast dedicated Fibre Networking Rings in all the Metros and Major Cities. Our networking architects will design the best possible solutions for availability including affordability. Fibre internet and networking services are more stable and provide higher throughput than other solutions. We provide true uncapped and unshaped internet access. Best use cases for VxCloud Fibre includes high availability networking, Internet, Cloud VPN, Cloud Networking (SD-WAN) and Large Data Transfer Volumes. VxCloud FTTH solutions includes Vodacom Fibre, Telkom OpenServe and Liquid Telecom Broadband Fibre.
